LOGNOTE -- Chief, Operations Group, 16 September 1983

1. [] BARBADOS SURVEY--In connection with plans to TDY [] to Barbados for a week to monitor Suriname and Grenada, set up a phone feed procedure between Barbados and Key West, and incidentally cruise out coverage potential of the location, I asked [] to review his IC stable to see whether it might yield a native Dutch speaker capable of processing any tapes sent here by the TDY team. [] came up with three iffy possibilities, one living in southern Virginia, two local. Of the two local people, one is an elderly lady with doubts and fears about the whole thing, the other is untested.

I asked [] to tell them to stand by, saying we may get in touch later. If we do get processable Dutch-language tapes we have a stopgap promise of help from an OT&E instructor. That will give us time to set up something for a longer term if need be. We could test these people with some of the first tapes to arrive here after we have processed them.
